

## NL-26

Heat seal press for  
flatwork and mat repair

*It's on track!*

**Highlights** • Backlight display • Timer 1 sec – 100 min. • Safety guard and two hand operation for maximum safety  
• Rotating sealing platen

### The NL-26 track mounted heat-seal press

This machine has a 200 x 300mm iron that will rotate almost 180 degrees to allow patching at any angle. The head slides with ease from one side to the other so there is no need to move the item to be sealed to the head. The machine offers a safety guard and two hand operation for maximum safety.

Electronic temperature and pressure controls are easily changeable and will not allow machine to operate if specifications are not met.

The standard base unit has a 305 x 182mm sealing area and an optional overhead tray to store 16 boxes of mending patches. To handle larger items a 3 meter wide base unit is available.

### Mat repair

The sealing time can be set between 1 sec. – 100 min. and the temperature between 20 - 220°C, this makes this machine very suitable for repairing dust control mats.

**Specifications:** For technical details please see our Specifications leaflet which can be downloaded from our website at [www.thermopatch.com](http://www.thermopatch.com)
